

FL-3X

A gel supplement that combines Glucosamine Hydrochloride, Chondroitin Sulphate and Methylsulphonylmethane (MSM) with plant extracts.

Formulated to optimise joint health. FL-3X may help pain management and cartilage preservation in degenerative joints, due to osteoarthritis and other causes of joint pain and inflammation.

Ideal for those with an active life.

Eight pouches per box, 12 servings per pouch (96 servings).

MSM, a supplement that speeds muscle recovery after intense exercise by reducing inflammation.

Glucosamine, a natural component of cartilage and one of the most well-studied supplements to treat osteoarthritis stiffness and joint pain.

Chondroitin, a building block of cartilage. It may also help prevent cartilage breakdown from osteoarthritis and may slow the progression of osteoarthritis when taken long term.

KEY INGREDIENTS

- 500mg Glucosamine HCL
- 300mg Chondroitin Sulphate
- 125mg MSM
- 36mg Vitamin C

RECOMMENDED USE

- Single serving is 2 teaspoons
- Pain management 3 servings/day
- Maintenance 1 serving/day

BENEFITS

- May help pain relief in degenerate joints
- Useful as a supplement in patients with known osteoarthritis, as it may help with cartilage preservation
- MSM is clinically validated to have anti-inflammatory properties and increases muscle recovery after intense exercise
- Vitamin C contributes to collagen formation for optimal function of bones and cartilage
- Gluten-free

90 Day Challenge - 100% money back guarantee, if after 90 days FL-3X doesn't make a difference to your joints.

Avoid use if: you have a fish or shellfish allergy, or if you suffer from known glaucoma or are prescribed warfarin.

Published on the Cologne List; FL-3X is safe for use by those in competitive sports
